

What makes a safety can safe?

Leaktight, gasketed lid controls vapors and guards against dangerous spillage. Spring loaded, it closes automatically after filling or pouring.

Free swinging, rounded carry handle pulls back to open lid

Positive pressure relief cap

Flame Arrester

Yellow belly band with warning and large content identification area

Approved container: FM, UL/ULC Listed, TÜV Certified

Cutaway view of a Type I safety can.

Proper grounding and bonding techniques safely prevent static discharge and the potential for explosion and fire.

Grounding wire connected to an electrical ground, such as a water pipe or ground strip.

Bonding wire connects dispensing can to receiving containers.
