

USE

The dispensing tray top of a plunger can incorporates a perforated metal flame arrester. Pressing down pumps liquid up from the can for safe moistening of cleaning rags.

Round bench-style wash tank has fusible link device to close lid in case of fire.

Perforated, spring-loaded dasher tray covers the opening of a bench can. Accessory basket holds small parts for immersing into cleaning solvent.

Self-closing, foot-operated lid on a Justrite rinse tank contains flammable vapors, snuffs out flash fire.
