

Disposal of Non-Oily Waste

Cease-Fire® Waste Receptacles are designed to self-extinguish accidental fires in waste paper and other solvent-free waste. Justrite FM approved receptacles in a range of sizes and colors are equipped with tops or heads having a large center opening for receiving the waste and a domed rim surrounding the opening. Smoke and gas from a fire inside the receptacle rise under the head rim and are directed back into the combustion area, cutting off outside oxygen supply and extinguishing the fire in a matter of seconds.

How "Cease-Fire" extinguishes fire

1. Fire starts and combustion vapors rise.
2. Baffle reverses flow.
3. Oxygen is cut off and fire dies.

Flammable Waste Collection

Safety Drain Cans have wide-mouth funnels to collect waste solvents from cleaning tanks and bench cans with minimum spillage or splash. A perforated metal flame arrester in the base of the funnel lets solvents drain into can freely, protecting contents from ignition sources. Drain cans are FM approved in both 3 and 5 gallon (11 and 19 Litre) sizes.
